### > The aluminum industry is our focus.

We provide key intelligence on the aluminum industry and its prices to companies that consider aluminum a strategic commodity in order to empower their business decisions. We have two decades of experience and serve over 150 companies around the world.

### > We produce strategic aluminum reports.

We produce strategic reports with in-depth analysis and forecasts on global and regional aluminum output, supply expansions, capacity utilization, industry costs, regional and sector demand, visible and invisible inventories, flow of funds, the alumina market, regional premiums and prices. Depending on your needs, you can choose the level of service that best fits you.

### > World Class Consultancy.

We provide premium aluminum consulting for the upstream and downstream industry as well for the hedge fund community. We have a highly qualified team of aluminum industry professionals with decades of experience.
